DIESEL ELECTRIC GENERATOR SERVICE

MEP, a leading company in providing solutions for critical power supply and cooling, collaborates with renowned manufacturers such as SDMO KOHLER and TEKSAN, offering installation, delivery, and maintenance of uninterruptible power supply equipment and diesel electric generators.

ABOUT

MEP, a leading company in providing critical power supply and cooling solutions, delivers, installs, and maintains equipment for uninterrupted power supply (UPS), diesel electric generators, and simulators for maritime education. As an authorized partner of renowned manufacturers such as SDMO, KOHLER, and TEKSAN, MEP also provides expert maintenance and service for diesel generators.

Reliable power sources

are essential for the efficient operation of any system that relies on a continuous power supply. Each power system consists of subsystems that are necessary for proper and uninterrupted operation, including the distribution power source (substations and switchgear, as well as wiring), as well as uninterruptible systems (UPS, DC system) and backup power (power generators). The more complex the system, the more important it is for all components to fit together perfectly.

STRENGTHS

MEP is the Official Representative for KOHLER SDMO and TEKSAN Generator Sets Maintenance in Croatia.

- **25 years of experience**
- **20 specialized technicians**
- **2 service centers across the country**
- **A portfolio of 350 diesel electric generators**
- **Availability 24/7 365 days a year**

Collaborating with global manufactures, MEP delivers maintenance services for diesel electric generators

SOLUTION

Preventive and Regular Annual Maintenance Service

- Visual inspection of the plant
- Visual inspection and control of control system parameters
- Oil check and replacement
- Coolant level check and replacement
- Air filter check and replacement
- Fuel level check and refilling
- Battery control, testing and cleaning
- Control and cleaning of the unit housing and surroundings
- Test run
- Load testing
- Report of performed works and measurements

Contracts are customized according to the needs and requirements of the user, as well as the specifics of the equipment and installation location.
