

# PREMIER IT SOLUTION PROVIDER

year 2024 / 02

## ACHIEVING PREMIER IT SOLUTION PROVIDER STATUS WITH SCHNEIDER ELECTRIC

MEP has been officially recognized as a Premier IT Solution Provider by Schneider Electric, thanks to continuous improvement and alignment with high standards.

This acknowledgment enables MEP to play a crucial role in shaping the future of data and energy management, offering innovative solutions tailored to the specific needs of clients.

## INTRODUCTION

MEP Company proudly announces a significant achievement - official recognition as a Premier IT Solution Provider by the global leader in energy management and automation, Schneider Electric. This success is the result of continuous improvement and dedication to the high standards set by Schneider Electric.

### Training

One of the key factors in achieving this recognition was the extensive training that MEP employees underwent. The company invested significant resources in educating its employees, ensuring that they are fully aligned with the high standards set by Schneider Electric. This commitment to employee education enabled the MEP team to meet the requirements necessary for implementing Schneider Electric's solutions.

### Specialization and Innovations

MEP particularly distinguished itself in the areas of 'Edge Networks' and 'Edge Solutions', specializing in 'Small Office Home Office' and 'EcoStruxure Row Data Center Solutions'. This commitment to continuous education ensured that the MEP team could offer customized, innovative solutions that meet clients' specific needs in data and energy management.

### Building and Maintaining IT Infrastructure

As a certified partner, MEP is recognized for its ability to build and maintain robust IT infrastructures that support its clients' business operations with reliability and efficiency. This capability is key to providing high-quality services and solutions tailored to the needs and expectations of clients.
